Rotaract Club of Xiamen University Malaysia | Rotary Club of Kuala Lumpur Dynamics | Rotary Club of Tun Razak Exchange

# SDC Hackathon

# Technical Tools Declaration

**Hosted by Xiamen University Malaysia (XMUM) AI Club**

**Submission Deadline: 25 October 2026**

Instructions: Declare every API, cloud service, AI tool, dataset, model, and sponsor resource your team used to build the project. Complete every section; where a category does not apply, tick "No" or write "None" – do not leave it blank. Submit as a single PDF document named "SDC2026_TeamName_TechDeclaration.pdf" together with your project submission. Undeclared third-party resources discovered at judging may affect your score or eligibility.

**SDC HACKATHON 2026**

# Technical & Tools Declaration

Hosted by Xiamen University Malaysia (XMUM) AI Club
Submission Deadline: [Insert date]

Instructions: Declare every API, cloud service, AI tool, dataset, model, and sponsor resource your team used to build the project. Complete every section; where a category does not apply, tick "No" or write "None" – do not leave it blank. Submit as a single PDF document named "SDC2026_TeamName_TechDeclaration.pdf" together with your project submission. Undeclared third-party resources discovered at judging may affect your score or eligibility.

## 1. Team & Project Overview

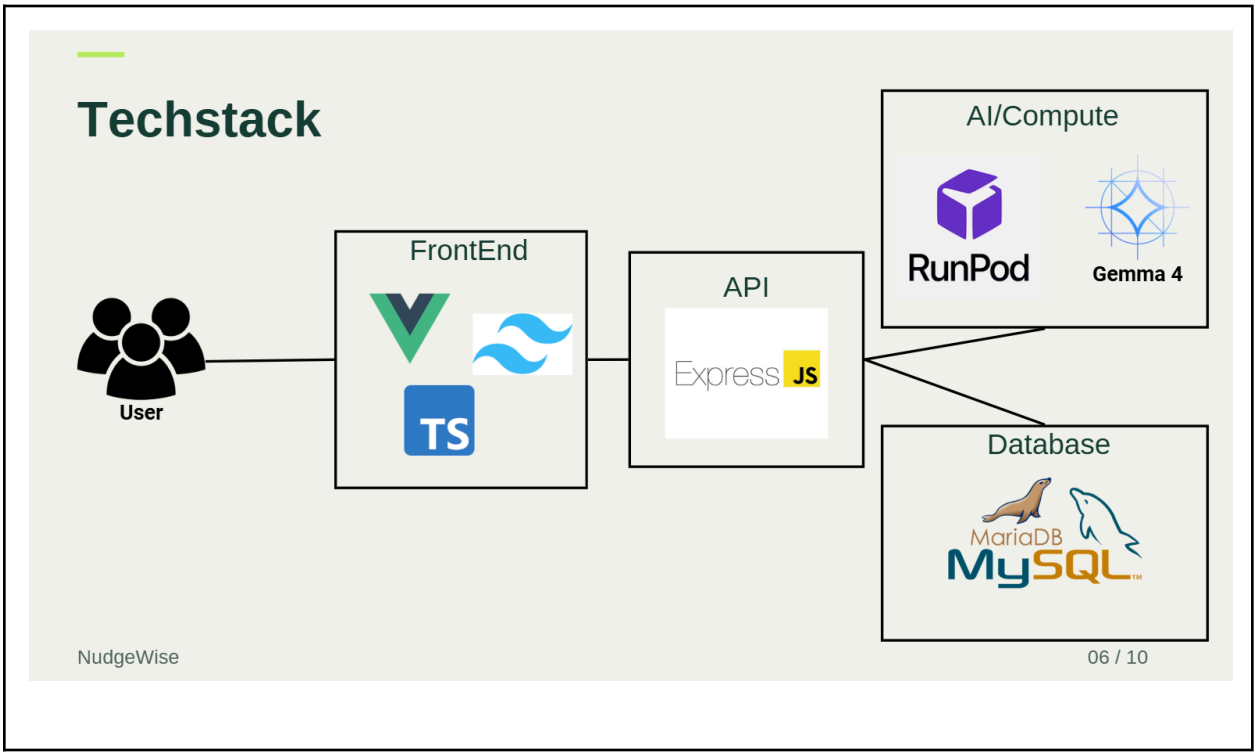

| | |
|---|---|
| **Team Name** | YOLO |
| **Project / Solution Name** | NudgeWise |
| **Name (Leader)** | WONG JIA SOON |
| **Email & Phone (Leader)** | wongjiasoon@gmail.com 011-11263048 |
| **University Affiliation(s)** | UNIVERSITI TEKNOLOGI MALAYSIA |
| **Live Prototype URL** | https://nudgewise-production.up.railway.app/ |
| **Code Repository URL (public / access granted to judges)** | https://github.com/Thafoxes/SDC-NudgeWise |

## 2. Architecture & Technology Stack

### 2.1 System Architecture Overview

*Describe how the components declared in this document connect end-to-end (e.g., user interface → backend → AI model/API → database → cloud hosting). Attach a system block diagram as an appendix if available.*

***[Maximum 200 words]***

### 2.2 Languages, Frameworks & Libraries

*List the main programming languages, frameworks, and third-party libraries that your team did not create. Open-source use is permitted provided it is declared and properly licensed/attributed.*

| Name & Version | Purpose in Project | License |
|---|---|---|
| Vue 3.5.44 | Reactive user interface and components | MIT |
| Tailwind CSS 3.4.19 | Utility-based interface routing | MIT |
| Mysql2 3.24.6 | MySQL/MariaDB database connection | MIT |
| Express Js | As API connecting database,ML to frontend | MIT |

| Name & Version | Purpose in Project | License |
| --- | --- | --- |
| | | |
| | | |

## 3. APIs & Cloud Services

### 3.1 External APIs

*List every external API your solution calls (GenAI, maps, payments, messaging, data feeds, etc.). Do not include API keys or secrets in this document.*

| API & Provider | Purpose in Project | Access Tier (free / paid / sponsor-provided) |
|---|---|---|
| Ollama | Use Gemma 4 as LLM | free |
| | | |
| | | |
| | | |
| | | |

### 3.2 Cloud Platforms & Deployment

*List every cloud service used for hosting, storage, databases, authentication, or compute, and indicate how the prototype is deployed.*

| Service & Provider | Purpose in Project | Plan / Region |
|---|---|---|
| RunPod | To host Ollama | US |
| | | |
| | | |
| | | |
| | | |

## 4. AI Tools, Models & Datasets

### 4.1 AI Models Used in the Solution

*List every AI model embedded in or called by your application, including pre-trained, fine-tuned, and self-trained models.*

| Model & Version | Source / Provider | Usage (pre-trained / fine-tuned / self-trained) | License / Terms |
|---|---|---|---|
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

### 4.2 Datasets

*List all datasets used for training, fine-tuning, evaluation, or in the running application. State clearly if a dataset contains personal or sensitive data.*

| Dataset Name | Source / URL | Type (public / private / self-collected / synthetic) | License | Personal Data? (Y/N) |
|---|---|---|---|---|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

### 4.3 AI-Assisted Development Tools

*Tools used to help write code, design, content, or documentation (e.g., chat assistants, code completion tools, image generators). Declaring these tools does not reduce your score; undeclared use may.*

Did your team use any generative-AI tool to help create code, design, text, or other project material?

✅ Yes ☐ No

If yes, list them below:

| **Tool & Version** | **Used For** | **Extent of Use (minor / moderate / major)** |
|---|---|---|
| Claude | Code generation | moderate |
| GPT-6.1 Sol | UAT generation, idea completion | moderate |
| Replit | Slide generation | minor |
| Graphify | Code simplification | Minor |
| | | |

Briefly describe how your team reviewed, tested, and took responsibility for AI-generated output:

***[Maximum 100 words]***

We have a plugin that helps us to create user tests and have humans test the feature until it is acceptable for prototyping.
AI to build our frontend as most of our team members are focusing on backend, API and some pitching.

## 5. Sponsor-Provided Resources

*Declare any official SDC sponsor-provided GenAI API, cloud credits, tools, mentoring, or data that your team used.*

Did your project use any official SDC sponsor-provided resource?

✅Yes ☐ No

If yes, list them below:

| **Sponsor** | **Resource (API / credits / platform / data)** | **How It Was Used in the Project** |
|---|---|---|
| Replit | credits | Used to generate slide presentation |
| | | |
| | | |
| | | |

Was the sponsor resource essential to the core functionality of the prototype, or could it be replaced? Explain briefly:

***[Maximum 100 words]***

| |
|---|
| Not essential and it could be replaced by Google office or other Multimodal LLM that can generate slide. |

## 6. Security, Privacy & Responsible Use

### 6.1 Data Handling & Privacy

*What user or personal data does your application collect, store, or send to third-party services (including AI APIs)? How is it protected, and how long is it kept? State "No user data is collected" if applicable.*

***[Maximum 150 words]***

User or customer's phone number and email will be collected due to invoice collection.

### 6.2 Known Limitations & Risks

*Identify the main technical limitations of your AI components (e.g., hallucination, bias, rate limits, dependency on a single provider) and any mitigation you have implemented.*

***[Maximum 150 words]***

Takes too long to respond as the model is quite big 31b. Might have to turn it down to e4b parameter for faster generation.

## 7. Compliance & Readiness Checklist

*Tick all boxes that apply before submitting.*

- ✅ All APIs, cloud services, AI tools, models, and datasets used in the project are declared in this document.
- ✅ All third-party code, datasets, and models are used in accordance with their licenses, and attribution is provided where required.
- ✅ No API keys, passwords, or other credentials are exposed in the code repository, prototype, or this document.
- ✅ Any use of generative-AI tools for development has been disclosed and reviewed by the team.
- ✅ Any use of official SDC sponsor resources has been declared in Section 5.
- ✅ The prototype described here is accessible to judges through the links provided in Section 1.
- ✅ All fields in this template have been completed within the word limits stated.

## 8. Declaration

By submitting this document, the team leader confirms that the information provided is complete and accurate to the best of the team's knowledge, and that every API, cloud service, AI tool, dataset, model, and sponsor resource used in the project has been declared.
